Joshua Lederberg, M.D.
Professor of Genetics
Stanford Medical Center
300 Pasteur Drive
Palo Alto, California

Dear Dr. Lederberg:

I was delighted recently to read in an HEW Report on Mental Retardation, of research being conducted by Dr. McKhann at Stanford Medical Center, on the use of games to facilitate the learning of basic number concepts by the mentally retarded. However, in a letter to Dr. McKhann, I indicated I was disappointed to see that there was no mention of his association as a Kennedy Scholar. We are very proud of his work and would like people, who are interested in this field to know what our scholars around the country are doing.

A second thought occurred to me. Do you have a picture of my brother, Joseph and a suitable name plate that might be displayed in your laboratory so that visitors will associate the laboratory with the Foundation? If you don't have such a picture, we will be happy to send you one.

Keep me posted on what is happening at Stanford - I'm always interested.

Sincerely,

Eunice Kennedy Shriver

Dean's office reports they have no picture
